Across the state, through eight regional areas CCRR agencies help parents sort through child care options and assist them in selecting quality child care. CCRRs help to increase the supply of child care in areas that may be lacking sufficient care, offer start up information and technical support to potential child care providers, and give technical assistance and support to existing child care programs. They help communities, employers, school districts, W-2 agencies, and others develop local solutions to complex child care problems. The CCR&Rs in Wisconsin refer equally to family child care and group centers, depending on parent need, preference and availability. CCR&Rs do this by connecting parents with the child care services they need, recognizing the influence that information and consumer education has on parental choice, and developing professionals who care for children. From business start-up information to training and technical assistance, CCR&Rs encourage business owners to go above and beyond the basic standards of quality in the care and education they provide for Wisconsin's children; and CCR&R's collect child care data that impacts communities and infuse that data into communities to inform decision-making and planning. CCR&Rs serve as Local YoungStar Offices to provide training and technical assistance to programs wishing to improve in quality.

Typically, these programs have been in public school buildings. An increased number of school districts have initiated community based approaches through partnerships that bring 4 and 5-year-old kindergarten programs into child care, preschool, or Head Start center settings. In these locations, licensed teachers may still have separate kindergarten classrooms, may team-teach in a blended program, or teach through other arrangements. As of the 2009-10 school year, 80 percent of districts were offering 4K, serving 38,000 students, 53 percent of the 4-year-olds in the state.

Since 1972, the National Women's Law Center has expanded the possibilities for women and girls in this country. The Center uses the law in all its forms: getting new laws on the books and enforced; litigating ground-breaking cases in state and federal courts all the way to the Supreme Court; and educating the public about ways to make the law and public policies work for women and their families. An experienced staff of more than 50 takes on the issues that cut to the core of women's and girls' lives in education, employment, family economic security, and health — with special attention given to the needs of low-income women and their families.
